INTRODUCTION

This management's discussion and analysis (MD&A) relates to the unaudited interim consolidated financial condition, results of operations, comprehensive income and cash flows for the three and six months ended February 28, 2017 (Q2 fiscal 2017) of NAV CANADA and its subsidiaries (also referred to in this MD&A as we, our, us or the Company). It should be read in conjunction with our unaudited interim condensed consolidated financial statements for Q2 fiscal 2017 (Q2 fiscal 2017 financial statements), our audited annual consolidated financial statements and the accompanying notes for the year ended August 31, 2016 (fiscal 2016), our fiscal 2016 annual MD&A, as well as our 2016 Annual Information Form dated October 27, 2016 (fiscal 2016 AIF). Additional information about NAV CANADA, including our consolidated financial statements for Q2 fiscal 2017 and fiscal 2016, our fiscal 2016 annual MD&A, and our fiscal 2016 AIF are filed on the System for Electronic Document Analysis and Retrieval (SEDAR) at www.sedar.com.

Our financial statements are prepared in Canadian dollars (CDN) and in accordance with International Financial Reporting Standards (IFRS). Our Q2 fiscal 2017 financial statements have been prepared in accordance with International Accounting Standards (IAS) 34 *Interim Financial Reporting*. Our Audit & Finance Committee reviewed this MD&A and our Board of Directors (the Board) approved it before it was filed

Caution Concerning Forward-Looking Information

This MD&A and, in particular, but without limitation, sections "RESULTS OF OPERATIONS - Financial Outlook" and "LIQUIDITY AND CAPITAL RESOURCES - Financial Instruments and Risk Management: Restructured and Other Investments in ABCP" of this MD&A, contain certain statements about NAV CANADA's future expectations. These statements are generally identified by words like "anticipate", "plan", "believe", "intend", "expect", "estimate", "approximate" and the like, as well as future or conditional verbs such as "will", "should", "would" and "could", or negative versions thereof. Because forward-looking statements involve future risks and uncertainties, actual results may be quite different from those expressed or implied in these statements. Examples include geopolitical unrest, terrorist attacks and the threat of terrorist attacks, war, epidemics or pandemics, natural disasters, weather patterns, environmental concerns, cyber security attacks, labour negotiations, arbitrations, workforce recruitment, training and retention, general aviation industry conditions, air traffic levels, the use of telecommunications and ground transportation as alternatives to air travel, capital market and economic conditions, the ability to collect customer service charges and reduce operating costs, the satisfaction of criteria for the remaining Aireon LLC (Aireon) investment tranche, the success of our investment in spacebased aircraft surveillance through Aireon, credit losses on investments, changes in interest rates, changes in laws, tax changes, adverse regulatory developments or proceedings and lawsuits. Some of these risks and uncertainties are explained under "Risk Factors" in our fiscal 2016 AIF. The forwardlooking statements contained in this MD&A represent our expectations as of April 12, 2017 and are subject to change after this date. Readers of this MD&A are cautioned not to place undue reliance on any forward-looking statement. We disclaim any intention or obligation to update or revise any forward-looking statements included in this document whether as a result of new information, future events or for any other reason, except as required by applicable securities legislation.

(in millions of dollars)

Our Business

NAV CANADA is the private sector, non-share capital company that operates Canada's civil air navigation system (ANS). With operations across Canada, we provide air navigation services to aircraft owners and operators within Canadian–controlled airspace. These services include air traffic control, flight information, weather briefings, airport advisories, aeronautical information and electronic navigation aids.

The core business of the Company is to manage and operate the ANS and related services in a safe, efficient and cost effective manner. Our mandate covers both Canadian airspace and airspace delegated to Canada under international agreements.

Financial Strategy and Rate Regulation

In establishing new customer service charges or revising existing charges, we must follow the charging principles set out in our governing legislation, the *Civil Air Navigation Services Commercialization Act* (ANS Act), which prevents us from setting customer service charges higher than what is needed to meet our financial requirements for the provision of air navigation services. Pursuant to these principles, the Board approves the amount and timing of changes to customer service charges. The Board also approves the Company's annual budget where the amounts to be recovered through customer service charges for the ensuing year are determined. Our aim is essentially to achieve breakeven financial results on an annual basis. Due to seasonal and other fluctuations in air traffic and given that our costs are predominantly fixed in nature, our quarterly financial results may not achieve a breakeven position, after recording adjustments to the rate stabilization account. This is illustrated in the table under the heading "SUMMARY OF QUARTERLY RESULTS – Quarterly Financial Information (unaudited)".

As noted above, customer service charges are set based on the Company's financial requirements, which take into account estimated air traffic volumes and planned expenses. Since actual revenue and expenses will differ from these estimates, methods to accumulate the variances are required so that they may be taken into account when setting future customer service charges. There is also a need to absorb the immediate effect of unpredictable factors — mainly fluctuations in air traffic volumes resulting from unforeseen events. We meet these objectives through a "rate stabilization" mechanism, as explained hereafter.

In preparing our consolidated financial statements, the timing of recognition of certain revenue and expenses differs from what would otherwise be expected for companies that are not subject to regulatory statutes governing the level of charges. For example, we adjust our net income (loss) through transfers to or from the rate stabilization account, based on variations from the amounts that were used when establishing customer service charges. If our actual revenue exceeds actual expenses, the excess is reflected as a credit to the rate stabilization account and is returnable to customers through future customer service charges. Similarly, if actual revenue turns out to be less than actual expenses, the revenue shortfall is reflected as a debit to the rate stabilization account and is recoverable from customers through future customer service charges (see "RESULTS OF OPERATIONS – Movements in Rate Stabilization Account").

In addition, for certain transactions where the timing of the cash flows differs significantly from the accounting recognition, the Company recognizes regulatory deferral account debits and credits in order to adjust the accounting recognition to the period in which they will be considered for rate setting. These transactions are generally considered for rate setting when the amounts are expected to be realized in cash.

(in millions of dollars)

When determining the level of customer service charges, we consider the Company's current and future financial requirements (see "RESULTS OF OPERATIONS – Net Movement in Regulatory Deferral Accounts Related to Net Income (Loss)" and "RESULTS OF OPERATIONS – Amounts Considered for Rate Setting Purposes").

Our financial strategy is to fulfil our essential services mandate based on a sound financial foundation, reflected in part through high credit ratings in the financial markets. Maintaining this strong foundation requires a prudent approach that balances the interests of our key stakeholders while complying with our statutory and contractual obligations.

Financial Highlights

Results of operations for the three months ended February 28, 2017

The Company recorded a net loss of \$34 in Q2 fiscal 2017 (Q2 fiscal 2016 - net loss of \$39). Excluding rate stabilization and other regulatory deferral account adjustments, the Company recorded a net loss of \$52 (Q2 fiscal 2016 - net loss of \$24). The second quarter normally has the lowest air traffic levels for the fiscal year, and given that our costs are predominantly fixed in nature, a net loss is expected for this quarter.

The net loss was lower than planned as the Company has achieved positive financial performance compared to its approved budget, as reflected by the \$12 of favourable variances from planned results shown below. This was due to revenue \$3 higher than planned, operating expenses \$2 lower than planned and regulatory deferrals of \$14, partially offset by other expenses \$7 higher than planned.

	Three months ended February								
									
	2	2017 2016			Change

(in millions of dollars)

¹⁾ In order to achieve breakeven results of operations, in the year ending August 31, 2017 (fiscal 2017), the Board approved a reduction of the rate stabilization account. As a result, \$38 is being transferred out of the rate stabilization account evenly throughout the fiscal year. In fiscal 2016, the Board approved an increase of the rate stabilization account. Accordingly, \$31 was transferred to the rate stabilization account. For the three months ended February 28, 2017, \$9 has been transferred from the rate stabilization account (three months ended February 29, 2016 - \$8 had been transferred to the rate stabilization account).

The Company is subject to legislation that regulates the level of its charges (see "INTRODUCTION – Financial Strategy and Rate Regulation"). The timing of the recognition of certain revenue and expenses recovered through charges is recorded through movements in regulatory deferral accounts. The net movement in regulatory deferral accounts for the three months ended February 28, 2017 was an income of \$18 as compared to a loss of \$15 over the same period in fiscal 2016. This change in regulatory deferrals of \$33 as compared to the same period in fiscal 2016 is due to lower deferrals of favourable results through rate stabilization adjustments of \$16 and a \$17 net increase in regulatory deferral adjustments to adjust the accounting recognition of certain transactions to the periods in which they will be considered for rate setting.

As shown below, cash and cash equivalents increased by \$52 during the three months ended February 28, 2017 and the Company experienced negative free cash flow of \$46, which is a non-GAAP (Generally Accepted Accounting Principles) financial measure (see "LIQUIDITY AND CAPITAL RESOURCES – Cash flows for the three months ended February 28, 2017" for additional information on non-GAAP financial measures and a discussion of cash flows).

⁽²⁾ See the statement of cash flows in our Q2 fiscal 2017 financial statements.

(in millions of dollars)

Results of operations for the six months ended February 28, 2017

The Company recorded a net loss of \$34 for the six months ended February 28, 2017 (six months ended February 29, 2016 - net loss of \$41). Excluding rate stabilization and other regulatory deferral account adjustments, the Company recorded a net loss of \$64 (six months ended February 29, 2016 - net loss of \$8). This is primarily due to seasonally low air traffic volumes in Q2 compared to our predominantly fixed costs and the effect of the one year temporary rate reduction averaging 3.9% in fiscal 2017.

The net loss was lower than planned as the Company has achieved positive financial performance in fiscal 2017 as compared to its approved budget, as reflected by the \$29 of favourable variances from planned results shown below. This was primarily due to revenue \$18 higher than planned, \$13 in regulatory deferral accounts and operating expenses \$3 lower than planned, partially offset by other expenses \$5 higher than planned.

	Six months ended February								
				Fe					
	2	017	2016		Ch	ange			
Revenue	\$	628	\$ 65	51	\$	(23)			
Operating expenses		649	60)3		46			
Other (income) and expenses		37	į	55		(18)

		40		7		33			
		30	(3	33)		63			
Net income (loss), after rate stabilization and									
regulatory deferral account adjustments	\$	(34)	\$ (4	1 1)	\$	7			

⁽¹⁾ The initial approved adjustment to reduce the rate stabilization account is being transferred evenly throughout the fiscal year. For the six months ended February 28, 2017, \$19 has been transferred from the rate stabilization account. In fiscal 2016, the Board approved an increase to the rate stabilization account. Accordingly, \$16 had been transferred to the rate stabilization account for the six months ended February 29, 2016.

(in millions of dollars)

The net movement in regulatory deferral accounts for the six months ended February 28, 2017 was a loss of \$30 as compared to an income of \$33 over the same period in fiscal 2016. This change in regulatory deferrals of \$63 is due to lower deferrals of favourable results through rate stabilization adjustments of \$30 and a \$33 net increase in regulatory deferral adjustments to adjust the accounting recognition of certain transactions to the periods in which they will be considered for rate setting.

As shown below, cash and cash equivalents increased by \$157 during the six months ended February 28, 2017 and the Company experienced negative free cash flow of \$22, which is a non-GAAP financial measure (see "LIQUIDITY AND CAPITAL RESOURCES – Cash flows for the three months ended February 28, 2017" for additional information on non-GAAP financial measures and a discussion of cash flows).

(in millions of dollars)

For a discussion of the changes in cash and cash equivalents from August 31, 2016, see "LIQUIDITY AND CAPITAL RESOURCES – Cash flows for the six months ended February 28, 2017".

See "INTRODUCTION – Significant Financial Matters" for discussion of the significant changes in current and long-term investments, including the investment in preferred interests, and long-term debt during the six months ended February 28, 2017.

The change in non-current employee benefit liabilities are a result of the re-measurement gains of employee defined benefit plans recorded during the six months ended February 28, 2017. The change in derivative liabilities is a result of positive fair value adjustments recorded on the Company's interest rate hedges. These changes along with the related changes in regulatory deferral account debit balances are discussed further in "RESULTS OF OPERATIONS – Other Comprehensive Income (Loss)".

The balance in retained earnings (deficit) as at February 28, 2017 reflects the earnings up to that date. We plan our operations to essentially result in an annual financial breakeven position after expenses are met through customer service charges and other revenue sources, and after adjustments are made to the rate stabilization account. As a result, the balance in the retained earnings (deficit) account at the end of each fiscal year has remained stable at \$28. Any variation from this amount at the end of any interim period reflects seasonal or other planned fluctuations in revenue and expenses.

Significant Financial Matters

The following items have significant financial importance to the Company:

1. Rate Stabilization Account

As at February 28, 2017, the rate stabilization account (see "RESULTS OF OPERATIONS – Movements in Rate Stabilization Account") had a credit balance of \$179, which is above its target of \$101 for fiscal 2017 (see "RESULTS OF OPERATIONS – Amounts Considered for Rate Setting Purposes").

The rate stabilization account improved by \$10 during fiscal 2017. This improvement was due to \$29 of favourable variances from planned results, arising mainly from higher than planned revenue, partially offset by the \$19 initially approved adjustment to the rate stabilization account. Rate stabilization adjustments are described under "RESULTS OF OPERATIONS – Movements in Rate Stabilization Account".

2. Air Traffic and Customer Service Charges¹

During the first six months of fiscal 2017, air traffic volumes increased by 4.7% year-over-year. Excluding the effect of the extra day for leap year in February 2016, year to date traffic was 5.3% higher than in the first six months of fiscal 2016. The approved budget for the fiscal year had assumed growth of 1.1%. The Company's current forecast for air traffic growth for fiscal 2017 is 5.4%.

We continuously monitor our financial requirements and air traffic, and regularly update our financial forecasts to account for changes in the economic environment. On a quarterly basis, we review the most current information available from aviation industry sources as well as forecasts of macroeconomic indicators; we then modify our forecasts accordingly and consider the need for a change in rates.

¹ Note: See "INTRODUCTION – Caution Concerning Forward-Looking Information", page 1

(in millions of dollars)

The Company does not intend to change customer service charges at this time. However, given the current strength of the rate stabilization account and our positive financial outlook for fiscal 2017 (see "RESULTS OF OPERATIONS – Financial Outlook"), over the next fiscal quarter the Company will consider changes to its customer service charges that, if enacted, would likely be implemented in September 2017. Any change in customer service charges would be implemented in accordance with the ANS Act.

3. Pension Plans

The Company funds its registered pension plans based on the January 1, 2016 actuarial valuations, as discussed in our fiscal 2016 annual MD&A. We use an annual measurement date of August 31 for determining the accounting surplus or deficit and establishing pension costs for the coming fiscal year. The Company's pension plans had an accounting deficit of \$1,415 as at the annual measurement date of August 31, 2016 and an accounting deficit of \$1,013 as at February 28, 2017. The \$402 decrease in the deficit position during the six months ended February 28, 2017 is primarily due to net actuarial gains of \$465 partially offset by actuarial accounting expense exceeding Company contributions by \$62. The \$465 of net actuarial gains are primarily due to a \$533 actuarial gain from a 50 basis point increase in the discount rate to 3.90% from 3.40% at August 31, 2016, partially offset by a return on plan assets \$68 less than the expected return based on the discount rate at August 31, 2016.

As at February 28, 2017, the Company has put in place letters of credit totalling \$468 (representing 9% of registered pension plan assets as at February 28, 2017) to meet its cumulative pension solvency funding requirements. Commencing in April 2017, the Company will fund its remaining calendar 2017 solvency funding requirements with cash contributions of approximately \$42 by the end of fiscal 2017.

Further information on the Company's pension plans is discussed under the heading "LIQUIDITY AND CAPITAL RESOURCES – Cash Requirements: Pension Plans".

4. Investment in Space-Based Aircraft Surveillance through Aircon:

As discussed in note 5 to the Q2 fiscal 2017 financial statements, as at February 28, 2017, the Company has invested \$135 U.S. (\$179 CDN) (August 31, 2016 - \$120 U.S. (\$157 CDN)). The Company is represented by four out of the eleven directors on Aireon's board of directors. The Company's investment in Aireon is in preferred interests, which are redeemable or convertible to common equity.

The Company completed its fourth tranche investment of \$15 U.S. (\$16 CDN) on December 21, 2016, increasing the fair value of its investment in preferred interests as well as its deferred tax liability. As at February 28, 2017, the Company's total fully diluted common equity interest on a post conversion basis is 38.1% (August 31, 2016 - 36.5%).

5. Collective Agreements

Approximately 87% of our workforce is unionized. All eight of our collective agreements were in force until the end of Q2 fiscal 2017 with contract expirations ranging from March 2017 to February 2018.

(in millions of dollars)

6. Investing and Financing Activities

During the six months ended February 28, 2017, the Company received the remaining \$285 principal balance of Master Asset Vehicle II (MAV II) Class A-1 and A-2 notes as well as the remaining \$7 principal balance of the restructured asset-backed commercial paper (ABCP) for total proceeds of \$292.

On December 16, 2016, the Company redeemed \$100 of the \$350 Series MTN 2009-1 General Obligation Notes with proceeds from the MAV II notes and surplus cash.

RESULTS OF OPERATIONS

Revenue

The following table provides a breakdown of our revenue by category. Our fiscal 2016 AIF and the notes to our fiscal 2016 annual consolidated financial statements provide more information about the different categories of our customer service charges.

		Three months ended February									
	2017		2016		2016		2016 Change		%		
Enroute	\$	142	\$	150	\$	(8)	(5%)				
Terminal		114		115		(1)	(1%)				
Daily / annual / quarterly		19		20		(1)	(5%)				
North Atlantic and international communication		9		10		(1)	(10%)				
Total customer service charges		284		295		(11)	(4%)				
Other		12		14		(2)	(14%)				
	\$	296	\$	309	\$	(13)	(4%)				

Other revenue consists of service and development contracts, conference centre services at our facility in Cornwall (Ontario), the sale of civil aeronautical publications and other miscellaneous revenue.

Revenue for Q2 fiscal 2017 was \$296 compared to \$309 for Q2 fiscal 2016. The \$13 decrease is primarily due to an \$11 decrease in customer service charge revenue arising from lower revised service charges (7.6% on average) that became effective September 1, 2016, partially offset by a 3.9% growth in air traffic volumes during Q2 fiscal 2017.

		Six months ended February								
	2017		2016		7 2016 Change		016 Change		%	
Enroute	\$	309	\$	326	\$	(17)	(5%)			
Terminal		230		231		(1)	-%			
Daily / annual / quarterly		40		40		-	-%			
North Atlantic and international communication		20		22		(2)	(9%)			
Total customer service charges		599		619		(20)	(3%)			
Other		29		32		(3)	(9%)			
	\$	628	\$	651	\$	(23)	(4%)			

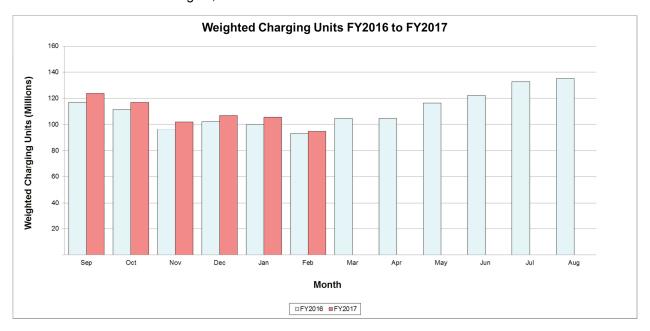

(in millions of dollars)

Revenue for the six months ended February 28, 2017 was \$628 compared to \$651 for the six months ended February 29, 2016. The \$23 decrease is primarily due to a \$20 decrease in customer service charge revenue arising from lower revised service charges (7.6% on average) that became effective September 1, 2016, partially offset by a 4.7% growth in air traffic volumes during fiscal 2017.

Air Traffic

Air traffic increased by 3.9% in Q2 fiscal 2017 when compared to Q2 fiscal 2016 (5.1% higher when excluding the effect of the leap year in February 2016). In the first six months of fiscal 2017, air traffic increased by 4.7% when compared to the first six months of fiscal 2016 (5.3% higher when excluding the effect of the leap year in February 2016). This increase is illustrated in the following chart showing air traffic by month since September 2015.

The chart illustrates the seasonal variations in traffic. The chart shows traffic in "weighted charging units", which reflect the number of flights, aircraft size and distance flown.

Future air traffic volumes may be influenced by numerous factors, including the rate of economic growth or decline, changing air passenger demand, aircraft capacity utilization levels, fuel costs, changes in air carrier operations, air carrier competition, airline restructurings and insolvencies, terrorist activities, epidemics or pandemics, weather patterns, natural disasters, environmental concerns, demographic patterns and other factors.

The Company does not intend to change customer service charges at this time. However, given the current strength of the rate stabilization account and our positive financial outlook for fiscal 2017 (see "RESULTS OF OPERATIONS – Financial Outlook"), over the next fiscal quarter the Company will consider changes to its customer service charges that, if enacted, would likely be implemented in September 2017. Any change in customer service charges would be implemented in accordance with the ANS Act.

(in millions of dollars)

Operating Expenses

		Three months ended February							
		2017		2017 2016		Change		%	
Salaries and benefits	\$	228	\$	215	\$	13	6%		
Technical services		26		28		(2)	(7%)		
Facilities and maintenance		18		17		1	6%		
Depreciation and amortization		37		35		2	6%		
Other		19		12		7	58%		
	\$	328	\$	307	\$	21	7%		

Salaries and benefits expense in Q2 fiscal 2017 increased by \$13 compared to Q2 fiscal 2016 primarily due to increased pension current service costs, compensation levels and overtime costs.

In Q2 fiscal 2016, the Company recognized a refund of commodity taxes of \$7 previously paid which was included in other operating expenses. In Q2 fiscal 2017, there is no refund offsetting expenses and therefore other operating expenses are higher. Travel and relocation expenses also increased compared to Q2 fiscal 2016.

	Six months ended February							
	2017		2016		Change		%	
Salaries and benefits	\$	447	\$	418	\$	29	7%	
Technical services		56		58		(2)	(3%)	
Facilities and maintenance		36		33		3	9%	
Depreciation and amortization		73		70		3	4%	
Other		37		24		13	54%	
	\$	649	\$	603	\$	46	8%	

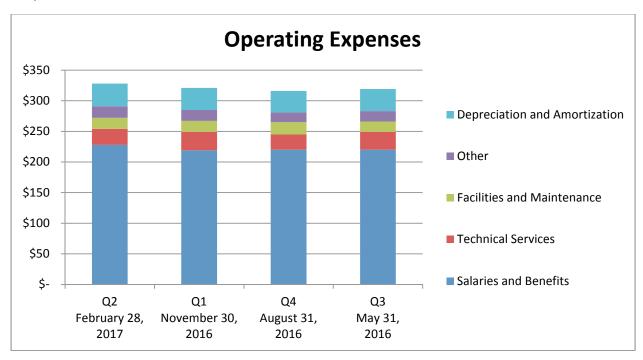

Salaries and benefits expense for the six months ended February 28, 2017 increased by \$29 compared to the six months ended February 29, 2016 due to increased pension current service costs, higher compensation levels and increased overtime. The Company uses a regulatory approach to determine the net impact charged to net income (loss) for its pension costs. The objective of this approach is to expense the cost of the Company's cash going concern and special payment contributions. Going concern pension contributions were lower for the six months ended February 28, 2017 and this reduction in expense was recorded as a net increase in regulatory deferral adjustments (see "LIQUIDITY AND CAPITAL RESOURCES – Cash Requirements: Pension Plans").

Other operating expenses for the six months ended February 28, 2017 increased by \$13 compared to the six months ended February 29, 2016. The increase is primarily due to the Company receiving a refund of commodity taxes previously paid in fiscal 2016. In fiscal 2017, there is no refund offsetting expenses. Travel and relocation costs as well as professional fees also increased in fiscal 2017 compared to fiscal 2016.

(in millions of dollars)

As illustrated in the table below, the majority of our operating expenses are incurred evenly throughout the year.

Other (Income) and Expenses

	 Three months ended February						
	2017	2016		С	hange		
Finance income							
Net change in fair value of financial assets at FVTPL ⁽¹⁾							
MAV II, ABCP and other investments	\$ (2)	\$	(4)	\$	(2)		
Investment in preferred interests	 (17)		(3)		14		
Total finance income	(19)		(7)		12		
Net interest costs relating to employee benefits	13		10		(3)		
Other finance costs							
Interest expense	20		25		5		
Other (gains) and losses	1		(3)		(4)		
	\$ 15	\$	25	\$	10		

⁽¹⁾ The net change in fair value of financial assets at fair value through profit or loss (FVTPL) includes interest and dividend income related to those financial assets.

(in millions of dollars)

The net change in fair value of financial assets at FVTPL increased by \$12 compared to Q2 fiscal 2016. Positive fair value adjustments on MAV II, ABCP and other investments of \$2 were recorded in Q2 fiscal 2017 compared to positive fair value adjustments of \$3 and interest income of \$1 in Q2 fiscal 2016. Positive fair value adjustments on the investment in preferred interests of \$14, along with dividend income of \$3 were recorded in Q2 fiscal 2017 compared to dividend income of \$3 in Q2 fiscal 2016. The increase in fair value is due to the write-up on the additional tranche investment made in December 2016. The Company values its investment at fair value using the price paid by other investors, which is higher than the price paid by the Company.

The \$3 increase in net interest costs relating to employee benefits in Q2 fiscal 2017 is primarily due to lower pension interest income than in Q2 fiscal 2016, partially offset by lower pension finance costs.

The \$5 decrease in other finance costs in Q2 fiscal 2017 is primarily due lower interest costs on long-term debt due to lower debt levels in Q2 fiscal 2017 compared to Q2 fiscal 2016.

Other (gains) and losses were a loss of \$1 in Q2 fiscal 2017 compared to a gain of \$3 in Q2 fiscal 2016. The change is mainly due to recording unrealized foreign exchange losses on the investment in Aireon in Q2 fiscal 2017 due to the fluctuation of the Canadian dollar against the U.S. dollar, compared to unrealized foreign exchange gains in Q2 fiscal 2016.

	Six months ended February							
		2017		2016	(Change		
Finance income								
Interest income	\$	(1)	\$	(1)	\$	-

Net interest costs relating to employee benefits		27		21		(6)		
Other finance costs								
Interest expense		41		50		9		
Redemption premium		10		<u> </u>		(10)		
		51		50		(1)		
Other (gains) and losses		(6)		(6)				
	\$	37	\$	55	\$	18		

⁽¹⁾ The net change in fair value of financial assets at FVTPL includes interest and dividend income related to those financial assets.

The net change in fair value of financial assets at FVTPL increased by \$25 compared to fiscal 2016, as a result of recording positive fair value adjustments on MAV II, ABCP and other investments of \$13 and interest income of \$1 in fiscal 2017 compared to positive fair value adjustments of \$2 and interest income of \$1 in fiscal 2016. Positive fair value adjustments on the investment in preferred interests of \$14, along with dividend income of \$6 were recorded in fiscal 2017 compared to dividend income of \$6 in fiscal 2016.

(in millions of dollars)

The \$6 increase in net interest costs relating to employee benefits in fiscal 2017 is primarily due to lower pension interest income than in fiscal 2016, partially offset by lower pension finance costs.

The \$1 increase in other finance costs in fiscal 2017 is a result of the redemption premium of \$10 related to the early redemption of \$100 of the \$350 Series MTN 2009-1 General Obligation Notes, partially offset by \$9 lower interest costs on long-term debt due to lower debt levels in fiscal 2017 compared to fiscal 2016.

Net Movement in Regulatory Deferral Accounts Related to Net Income (Loss)

The net movement in regulatory deferral accounts related to net income (loss) represents the regulatory accounting adjustments, including the rate stabilization mechanism, to adjust the accounting recognition of certain transactions to the periods in which they will be considered for rate setting. The Company's regulatory approach has not changed from that disclosed in the fiscal 2016 annual MD&A.

	Three months ended February							
	2017			2016	Change			
Rate stabilization account Other regulatory deferral accounts	\$	(3)	\$	(19)	\$	16		
Employee benefit pension contributions		32		10		22		
Investment in preferred interests, net of tax	_	(11)	_	(6)	_	(5)		
	\$	18	\$	(15)	\$	33		

The movements in the rate stabilization account in Q2 fiscal 2017 are a result of favourable variances from planned results of \$12 (Q2 fiscal 2016 - \$11) and the initial approved transfer out of the rate stabilization account of \$9 (Q2 fiscal 2016 - \$8 transfer to the rate stabilization account).

The net movement in the employee benefit pension contributions regulatory deferral account for Q2 fiscal 2017 increased by \$22 compared to Q2 fiscal 2016. Regulatory adjustments to adjust the total pension benefit expense to the level of pension contributions to be recovered through rate setting were \$32 in Q2 fiscal 2017 compared to \$10 in Q2 fiscal 2016.

The \$5 increase in the investment in preferred interests regulatory deferral account in Q2 fiscal 2017 was primarily due to the regulatory deferral of the \$14 increase in fair value of the investment, partially offset by the \$4 increase in the deferred income tax liability and the change in unrealized foreign exchange gains of \$4 in Q2 fiscal 2016 to unrealized foreign exchange losses of \$1 in Q2 fiscal 2017 due to the fluctuation of the Canadian dollar against the U.S. dollar.

(in millions of dollars)

	Six months ended February								
	20	2016		Ch	ange				
Rate stabilization account	\$	(10)	\$	(40)	\$	30			
Other regulatory deferral accounts									
Employee benefit pension contributions		62		21		41			
Other employee benefits		(3)		(3)		-			
Investment in preferred interests, net of tax		(20)		(12)		(8)			
Realized hedging transactions		1		1		<u>-</u>			
	\$	30	\$	(33)	\$	63			

The movements in the rate stabilization account are detailed in the table below under "RESULTS OF OPERATIONS – Movements in Rate Stabilization Account".

The net movement in the employee benefit pension contributions regulatory deferral account for the six months ended February 28, 2017 increased by \$41 compared to the same period in fiscal 2016. Regulatory adjustments to adjust the total pension benefit expense to the level of pension contributions to be recovered through rate setting were \$62 in fiscal 2017 compared to \$21 in fiscal 2016.

The \$8 increase in the investment in preferred interests regulatory deferral account for the six months ended February 28, 2017 was primarily due to the regulatory deferral of the \$14 increase in fair value of the investment, partially offset by the \$5 increase in the deferred income tax liability.

(in millions of dollars)

Movements in Rate Stabilization Account

Our rate stabilization mechanism and accounting are described at the beginning of this MD&A and in notes 1 and 9 of our fiscal 2016 annual consolidated financial statements. The table below shows the movements in the rate stabilization account.

	Six months ended February						
	2	.017	2016		Change		
Credit balance on the statement of financial position, beginning of period	\$	169	\$	81	\$	88	
Variances from planned results: Revenue higher than planned		18		11		7	
Operating expenses lower than planned		3		26		(23)	
Other (income) and expenses lower than planned		(5)		1		(6)	
Net movement in other regulatory deferral accounts		13		(14)		27	
Total variances from planned results		29		24		5	
Initial approved adjustment		(19)		16		(35)	
Net movement in rate stabilization account recorded in net income (loss)		10		40		(30)	
Credit balance on the statement of financial position, end of period	\$	179	\$	121	\$	58	

The \$10 improvement in the rate stabilization account during the six months ended February 28, 2017 is primarily due to:

- revenue that was \$18 higher than planned due to an increase in customer service charge revenue arising from higher air traffic;
- net movement of \$13 in regulatory deferral accounts that was more favourable than planned primarily due to:
 - a regulatory deferral credit for pensions that was \$16 higher than planned primarily due to a 50 basis point decrease in the discount rate from when the fiscal 2017 budget was approved, partially offset by
 - a regulatory deferral debit to defer the impacts to net (income) loss related to the Company's investment in preferred interests of Aireon that was \$3 less favourable than planned;
- operating expenses that were \$3 lower than planned, mainly due to lower technical services, facilities and maintenance and other operating costs, partially offset by higher salaries and benefits expense and higher depreciation and amortization;

partially offset by:

(in millions of dollars)

- other (income) and expense that was \$5 higher than planned as a result of the redemption premium of \$10 and income taxes \$5 higher than planned, partially offset by foreign exchange gains of \$6 and positive fair value adjustments \$4 higher than planned;
- the planned adjustment of \$19, representing half of the anticipated net loss at the time the fiscal 2017 budget was approved.

Other Comprehensive Income (Loss)

The accounting recognition of other comprehensive income (loss) amounts are offset by regulatory deferrals in order to defer the accounting recognition to the periods in which they will be considered for rate setting. These transactions are generally considered for rate setting when the amounts are expected to be realized in cash, with the exception of the cash flows related to hedging instruments, which are considered for rate setting in the same period as the underlying hedged transaction, and remeasurements of unfunded defined employee benefit plans, which are considered for rate setting over the employees' average expected remaining service period.

	Three months ended February							
	2017	2016	Change					
Items that will not be reclassified to income or (loss):								
Re-measurements of employee defined benefit plans	\$ 158	\$ (139)	\$ 297					
Net movement in regulatory deferral accounts	(158)	139	(297)					
Items that will be reclassified to income or (loss):								
Amortization of loss on cash flow hedge to								
net income (loss)	1	-	1					
Changes in fair value of cash flow hedges	-	(63)	63					
Net movement in regulatory deferral accounts	(1)	63	(64)					
Total other comprehensive income (loss)	\$ -	\$	<u> </u>					

Re-measurement gains of employee defined benefit plans in Q2 fiscal 2017 of \$158 are a result of actuarial gains of \$119, primarily due to a 10 basis point increase in the discount rates to 3.90% and a return on plan assets \$39 greater than the expected return based on the discount rate of 3.40% at August 31, 2016. In Q2 fiscal 2016, the re-measurement losses of \$139 were mainly due to actuarial losses of \$115, primarily due to a 10 basis point decrease in the discount rate, and a return on plan assets \$93 less than the expected return based on the discount rate, partially offset by actuarial gains from demographic changes of \$69.

During Q2 fiscal 2017, there was no change in fair value of the Company's interest rate hedges related to the re-financing of debt instruments that will mature in the fiscal year ending August 31, 2019 (fiscal 2019). In Q2 fiscal 2016, negative fair value adjustments of \$12 were recorded on the same interest rate hedges. During Q2 fiscal 2016, the Company cash-settled interest rate hedges related to the refinancing of debt instruments that matured in February 2016. A loss of \$51 on the forward dated interest rate swap agreements was recognized in other comprehensive income (loss) and is being reclassified to net income (loss) using the effective interest rate method over the 30-year term of the hedged Series MTN 2016-1 General Obligation Notes.

(in millions of dollars)

	Six months ended February								
	2017	2016	Change						
Items that will not be reclassified to income or (loss):									
Re-measurements of employee defined benefit plans	\$ 476	\$ (22)	\$ 498						
Net movement in regulatory deferral accounts	(476)	22	(498)						
			<u> </u>						
Items that will be reclassified to income or (loss):									
Amortization of loss on cash flow hedge to									
net income (loss)	1	-	1						
Changes in fair value of cash flow hedges	36	(74)	110						
Net movement in regulatory deferral accounts	(37)	74	(111)						
Total other comprehensive income (loss)	\$ -	\$	\$ -						

Re-measurement gains of employee defined benefit plans in the six months ended February 28, 2017 are primarily due to net actuarial gains of \$544, primarily due to a 50 basis point increase in the discount rates to 3.90% (August 31, 2016 - 3.40%), partially offset by a return on plan assets \$68 less than the expected return based on the discount rate at August 31, 2016. For fiscal 2016, the net re-measurement losses of \$22 were mainly a result of a return on plan assets \$82 less than the expected return based on the discount rate, partially offset by actuarial gains of \$60, primarily due to demographic changes.

In fiscal 2017, positive fair value adjustments of \$36 were recorded on the Company's interest rate hedges related to the re-financing of debt instruments that will mature in fiscal 2019. In fiscal 2016, negative fair value adjustments of \$23 were recorded on the same interest rate hedges. In addition, during Q2 fiscal 2016, the Company cash-settled interest rate hedges related to the re-financing of debt instruments that matured in February 2016. A loss of \$51 on the forward dated interest rate swap agreements was recognized in other comprehensive income (loss) and is being reclassified to net income (loss) using the effective interest rate method over the 30-year term of the hedged Series MTN 2016-1 General Obligation Notes.

(in millions of dollars)

Amounts Considered for Rate Setting Purposes

As discussed under "INTRODUCTION – Financial Strategy and Rate Regulation", when establishing customer service charges the Board considers the Company's current and future financial requirements as well as the current and anticipated balance in the rate stabilization account as compared to its target balance.

The table below shows the balance of the rate stabilization account as compared to its target balance.

		ruary 28 2017	August 31 2016		С	hange
Rate stabilization account credit balance	\$	179	\$	\$ 169		10
Fair value variances on ABCP investments		-		11		(11)
Face value variance on MAV II Class A-2 notes when purchased in fiscal 2011 Credit loss provisions on ABCP investments	_	- -		3		(3)
Net non-credit related fair value variances from face value		<u> </u>		14		(14)
"Notional" balance of the rate stabilization account(1)		179		183		(4)
Target balance of the rate stabilization account ⁽²⁾		(101)	(100)		(1)
Amount to be returned over time through rate setting	\$	78	\$	83	\$	(5)

As at August 31, 2016, the amount to be returned over time through rate setting was \$83. There has been a decrease in the amount to be returned over time through rate setting by \$5 to \$78 during the six months ended February 28, 2017.

- Due to the receipt of the remaining proceeds from the maturity of ABCP investments in Q2 fiscal 2017, there is no further requirement to "notionally" adjust the balance of the rate stabilization account.
- The long-term target credit balance of the rate stabilization account is 7.5% of total planned annual expenses net of other (income) and expenses, excluding non-recurring items, on an ongoing basis. For fiscal 2017, the target balance is \$101.

(in millions of dollars)

Financial Outlook²

Presented below are the Company's current projected annual consolidated results before rate stabilization for fiscal 2017 compared to fiscal 2016 results.

	Fiscal Fiscal 2017 2016		Change		%	
Before rate stabilization						
Revenue	\$ 1,357	\$	1,393	\$	(36)	(3%)
Operating expenses and other (income) and expenses, including other						
regulatory adjustments	 1,331		1,305		26	2%
Net income (loss) before rate stabilization adjustments	\$ 26	\$	88	\$	(62)	

Revenue

Total revenue for fiscal 2017 is expected to decrease by approximately 2.6% or \$36 from \$1,393 in fiscal 2016, primarily due to the lower revised service charges (7.6% on average) that became effective September 1, 2016, partially offset by forecasted air traffic growth of 5.4%.

In our Q1 fiscal 2017 MD&A, we had disclosed anticipated revenue of \$1,333 for fiscal 2017. The \$24 increase in forecasted revenue is primarily due to an increase in air traffic, which grew by 4.7% in the first six months of fiscal 2017 compared to the forecast of 3.9%.

Operating Expenses and Other (Income) and Expenses

Operating expenses and other (income) and expenses before rate stabilization for fiscal 2017 are expected to be \$1,331. This is an increase of \$26 compared to fiscal 2016 due to:

- higher compensation levels, including increased overtime;
- increased operational requirements in the areas of technical services and facilities and systems maintenance;
- increased other operating expenses, as refunds of \$7 relating to commodity taxes paid in prior years were received in fiscal 2016 with no equivalent amount forecasted for fiscal 2017; and
- the effects of inflation;

partially offset by:

- lower expected regulatory pension expense, due to lower expected going concern pension contributions on which the regulatory pension expense is based (presented on the statement of comprehensive income as higher pension current service costs and net interest costs that are more than offset by the higher regulatory deferral); and
- higher positive fair value adjustments on investments.

 $^{^{2}}$ Note: See "INTRODUCTION – Caution Concerning Forward-Looking Information", page 1 $\,$

(in millions of dollars)

Across the Company, we remain focused on cost saving measures that are consistent with safety, which is our top priority. Our efforts are aimed at managing staffing levels and discretionary expenses, as well as continuing to implement process improvement initiatives and efficiencies.

In our Q1 fiscal 2017 MD&A, we had disclosed anticipated operating expenses and other (income) and expenses, before rate stabilization of \$1,347 for fiscal 2017. The \$16 decrease is primarily due to lower forecasted regulatory pension expense due to lower expected going concern pension contributions on which the regulatory pension expense is based and lower operating expenses.

Cash Flows

Given the expected net cash flows from operations and cash flows from investing and financing activities in fiscal 2017, the Company's cash position is currently expected to increase to \$203 as at August 31, 2017 from \$119 as at August 31, 2016. This cash outlook is based on anticipated annual cash inflows from operating and investing activities of \$138 and \$84 respectively, offset by cash outflows from financing activities of \$135 for the repayment of long-term debt. Investing activities in fiscal 2017 include cash inflows of \$292 from proceeds from the maturity of ABCP investments, partially offset by forecasted cash outflows for projected capital expenditures of \$167, investments in preferred interests of Aireon of \$36 and an income tax payment of \$5. As discussed below, the Company has adequate existing sources of financing to cover all of its anticipated cash flow requirements.

In our Q1 fiscal 2017 MD&A, we had disclosed an anticipated cash position of \$117 by the end of fiscal 2017. The \$86 increase in our cash position at the end of fiscal 2017 is primarily due to a decrease in cash outflows from financing activities as less debt is forecasted to be redeemed.

Rate Stabilization Account

As noted above, the Company has implemented revisions to its customer service charges, effective September 1, 2016. In addition to revising our base rates in order to ensure they are aligned with costs, we have also implemented a temporary one-year reduction in base rates, representing on average a 3.7% reduction from fiscal 2016 base rates. The purpose of the one-year temporary rate reduction is to return to customers the estimated amount by which the notional balance of the rate stabilization account exceeded its target balance at August 31, 2016 (see "RESULTS OF OPERATIONS – Amounts Considered for Rate Setting Purposes").

The Company currently anticipates that the rate stabilization account will have a credit balance of \$195 at the end of fiscal 2017, resulting from estimated revenue of \$1,357, after considering the revisions to base rates and the temporary rate reduction, and total operating expenses and other (income) and expense (including other regulatory adjustments) of \$1,331 (before rate stabilization). The target balance of the rate stabilization account in fiscal 2017 is \$101.

In our Q1 fiscal 2017 MD&A, we had forecast an anticipated rate stabilization account credit balance of \$155 at the end of fiscal 2017. The increase in the rate stabilization account outlook to \$195 at the end of fiscal 2017 is due to the increase in net income of \$40 from the changes in the forecast since Q1 fiscal 2017 discussed above.

As noted previously, the Company does not intend to change customer service charges at this time. However, given our positive financial outlook for fiscal 2017, over the next fiscal quarter the Company will consider changes to its customer service charges that, if enacted, would likely be implemented in September 2017.

(in millions of dollars)

Earnings and Cash Flow Coverage

During a fiscal year, quarterly revenue will reflect seasonal or other fluctuations in the airline industry and therefore our net results vary from quarter to quarter. Our mandate to operate on essentially a financial breakeven basis results in a planned earnings coverage ratio – calculated on the basis of earnings before interest divided by interest expense – that is close to one-to-one. However, the seasonal nature of our revenue may result in an earnings coverage ratio of less than one-to-one for any interim period.

For the twelve months ended February 28, 2017, the Company achieved net income of \$7. Our interest cost was \$94. Consolidated earnings (after rate stabilization) before interest were \$101, which is 1.07 times our interest requirement for the fiscal year and just above our one-to-one target. Depreciation and amortization expense for this period was \$144. Our cash flow coverage was 2.61 times our interest requirement for this period.

Earnings coverage ratio and cash flow coverage are non-GAAP financial measures and do not have any standardized meaning prescribed by IFRS. The earnings coverage ratio and cash flow coverage are provided pursuant to and in compliance with National Instrument 44-102 *Shelf Distributions* of the Canadian Securities Administrators. The Company calculates the earnings coverage ratio on the basis of earnings before interest expense on financial liabilities at amortized cost (interest expense) divided by interest expense. Cash flow coverage is calculated on the basis of earnings (after rate stabilization) before interest expense, depreciation and amortization divided by interest expense. Under the *Income Tax Act* (Canada), NAV CANADA, excluding its subsidiaries, is not subject to income taxes and accordingly, no deduction for income taxes has been made. After the application of rate regulated accounting, the provision for income taxes related to our taxable subsidiaries is insignificant.

We maintain a debt service reserve fund and an operations and maintenance reserve fund under our Master Trust Indenture and we are subject to liquidity covenants under our General Obligation Indenture, designed to cover 12 months interest on borrowings and 25% of our annual operating and maintenance expenses. As at February 28, 2017, we were in full compliance with our debt indentures, including the Master Trust Indenture's requirements regarding the reserve funds, the flow of funds and with the rate covenants, as well as the liquidity and other provisions of the General Obligation Indenture.

Related Party Transactions

The Company's related parties include its key management personnel, subsidiaries, joint venture and registered pension plans for its employees. The transactions with these related parties are not materially different from what was reported in the fiscal 2016 annual MD&A.

(in millions of dollars)

Discussion of Quarterly Results

The quarterly variations in revenue mainly reflect seasonal fluctuations. Typically, revenue is highest in our fourth quarter (June to August) as a result of increased air traffic in the summer months. The second quarter (December to February) typically has the lowest air traffic volumes. Air traffic for Q2 fiscal 2017 was 3.9% higher on average than in Q2 fiscal 2016 (5.1% higher when the effect of an extra day for the leap year in February 2016 is excluded). Effective September 1, 2016, the Company implemented revisions to its service charges resulting in reductions on average of 7.6%.

The majority of our operating expenses are incurred evenly throughout the year.

Other (income) and expenses fluctuate primarily due to:

- fair value adjustments on investments and derivative instruments which change based on market factors and changes in expectations of credit losses; and
- changes in foreign exchange (gains) or losses as a result of the strengthening or weakening of the Canadian dollar compared to foreign currencies in which the Company transacts, mainly the U.S. dollar.

Net movement in regulatory deferral accounts related to net income (loss) fluctuates due to:

- changes in the rate stabilization account based on variances from planned results and the initial approved adjustment;
- changes in employee benefit pension contributions and expense;
- changes in other employee benefits, including long-term disability (LTD) funding requirements;
- changes in the investment in preferred interests of Aireon, net of tax; and
- · changes in realized hedging transactions.

LIQUIDITY AND CAPITAL RESOURCES

Our fiscal 2016 annual MD&A explains how we manage our cash and capital resources. There have been no changes in that approach for the six months ended February 28, 2017. The following sections discuss changes in our cash and capital resources since August 31, 2016.

As at February 28, 2017, we had \$276 of cash and cash equivalents and committed credit facilities of \$1,190, of which \$440 was available for unrestricted use (see "LIQUIDITY AND CAPITAL RESOURCES – Liquidity and Financing Strategy").

(in millions of dollars)

Cash flows for the three months ended February 28, 2017

		uary				
	2	017	2016		Change	
Cash flows from:						
Operations	\$	3	\$	10	\$	(7)
Investing		163		(29)		192
Financing		(110)		(233)		123
Cash flows from operating, investing						
and financing activities		56		(252)		308
Effect of foreign exchange on cash and cash equivalents		(4)		1		(5)
Increase (decrease) in cash and cash equivalents		52		(251)		303
Cash and cash equivalents, beginning of period		224		310	_	(86)
Cash and cash equivalents, end of period	\$	276	\$	59	\$	217
Free cash flow (non-GAAP financial measure): Cash flows from:						
Operations	\$	3	\$	10	\$	(7)
Capital expenditures ⁽¹⁾		(28)		(29)		1
Investment in preferred interests ⁽¹⁾		(16)		-		(16)
Income tax payment on investment in preferred interests ⁽¹⁾		(5)	_	<u>-</u>	_	(5)
Free cash flow	\$	(46)	\$	(19)	\$	(27)

⁽¹⁾ See the statement of cash flows in our Q2 fiscal 2017 financial statements.

As shown above, cash and cash equivalents increased by \$52 for the three months ended February 28, 2017 and the Company experienced negative free cash flow of \$46, which is a non-GAAP financial measure. Non-GAAP financial measures do not have any standardized meaning prescribed by IFRS and therefore may not be comparable to similar measures presented by other issuers. The Company defines free cash flow as cash generated from operations, less capital expenditures and investments in Aireon and other subsidiaries. Management places importance on this indicator as it assists in measuring the impact of its investment program on the Company's financial resources.

Cash flows from operations for the three months ended February 28, 2017 decreased by \$7 from the three months ended February 29, 2016, primarily due to lower receipts from customers of \$21 and a commodity tax refund of \$4 in fiscal 2016, partially offset by \$7 lower payments to employees and suppliers, lower special pension payments of \$7 and lower interest payments of \$5.

Cash flows from investing activities for the three months ended February 28, 2017 were inflows of \$163 compared to outflows of \$29 in the three months ended February 29, 2016. We received \$212 of proceeds from MAV II notes during the three months ended February 28, 2017. This cash inflow was partially offset by an investment of \$31 in capital projects (cash outflows of \$28) compared to \$27 in Q2 fiscal 2016 (cash outflows of \$30). In addition, we invested an additional \$16 in investments in preferred interests and made an income tax payment of \$5 related to that investment.

(in millions of dollars)

Cash outflows from financing activities for the three months ended February 28, 2017 were \$110 compared to \$233 for the three months ended February 29, 2016. The outflows were a result of the redemption of \$100 of the \$350 Series MTN 2009-1 General Obligation Notes at a redemption price of \$110.

For the three months ended February 29, 2016, our cash and cash equivalents balance decreased by \$251. This was primarily due to repayment of the \$450 Series MTN 2006-1 General Obligation Notes, the payment of \$51 to settle the interest rate swap agreements, and investment in capital projects of \$29 (excluding capitalized interest), partially offset by the issuance of the \$250 Series MTN 2016-1 General Obligation Notes (\$248 net of transaction costs), a \$20 drawdown of surplus funds from the debt service reserve fund and cash inflows from operations of \$10.

Cash flows for the six months ended February 28, 2017

	Six months ended February						
				2016			
Cash flows from:		2017	2010		_	Change

Investment in preferred interests ⁽¹⁾		(16)		-		(16)	
Income tax payment on investment in preferred interests ⁽¹⁾	\$	(5)	\$	- 22	\$	(5)	
Free cash flow	Ф	(22)	Ф	33	Ф	(55)	

⁽¹⁾ See the statements of cash flows of our Q2 fiscal 2017 financial statements.

As shown above, cash and cash equivalents increased by \$157 for the six months ended February 28, 2017 and the Company experienced negative free cash flow of \$22, which is a non-GAAP financial measure as discussed in "LIQUIDITY AND CAPITAL RESOURCES – Cash flows for the three months ended February 28, 2017".

Cash flows from operations for the six months ended February 28, 2017 decreased by \$37 from the six months ended February 29, 2016, primarily due to lower receipts from customer service charges of \$31, higher payments to employees and suppliers of \$21 and lower other receipts of \$4, partially offset by lower pension special payment contributions of \$14 and lower interest payments of \$6.

(in millions of dollars)

Cash flows from investing activities for the six months ended February 28, 2017 were inflows of \$211 compared to outflows of \$35 in the six months ended February 29, 2016. During the six months ended February 28, 2017, we received \$292 of proceeds from MAV II notes and restructured ABCP compared to \$2 received in the six months ended February 29, 2016. This cash inflow was partially offset by an investment of \$62 in capital projects (cash outflows of \$61) compared to \$62 in the six months ended February 29, 2016 (cash outflows of \$64). In addition, we invested an additional \$16 in investments in preferred interests and made an income tax payment of \$5 related to that investment. In fiscal 2016, the Company received recoverable input tax payments of \$26 on termination of the cross border transaction. No similar payment was received in fiscal 2017.

Cash outflows from financing activities for the six months ended February 28, 2017 were \$110 compared to \$233 for the six months ended February 29, 2016. The outflows were a result of the redemption of \$100 of the \$350 Series MTN 2009-1 General Obligation Notes at a redemption price of \$110.

For the six months ended February 29, 2016, our cash and cash equivalents balance decreased by \$171. This was primarily due to repayment of the \$450 Series MTN 2006-1 General Obligation Notes, the payment of \$51 to settle the interest rate swap agreements, and investment in capital projects of \$63 (excluding capitalized interest), partially offset by the issuance of the \$250 Series MTN 2016-1 General Obligation Notes (\$248 net of transaction costs), cash inflows from operations of \$96, the receipt of \$26 in recoverable input tax payments on termination of the cross border transaction and a \$20 drawdown of surplus funds from the debt service reserve fund.

Liquidity and Financing Strategy

Our liquidity and financing strategy remains unchanged from that disclosed in our fiscal 2016 annual MD&A.

During the quarter, the Company redeemed \$100 of the \$350 Series MTN 2009-1 General Obligation Notes with proceeds from the MAV II notes and surplus cash.

We are exposed to re-financing risk with respect to our bond and note maturities, including the \$25 annual amortizing payment due on the Series 97-2 amortizing revenue bonds. We mitigate this risk by maintaining committed credit facilities in an amount sufficient to meet our refinancing needs in the event of temporary capital market disruptions or lack of access to the market for any reason. The Company also has a Base Shelf Prospectus in place that is valid until December 6, 2017.

(in millions of dollars)

The Company has a revolving credit facility with a syndicate of Canadian financial institutions and separate letter of credit facilities for pension funding purposes. As at February 28, 2017, the credit facilities are utilized as follows:

Credit facilities:	
Credit facility with a syndicate of Canadian financial institutions (1)	\$ 675
Letter of credit facilities for pension funding purposes (2)	515
Total available credit facilities	1,190
Less: Outstanding letters of credit (2)	480
Undrawn committed borrowing capacity	710
Less: Operations and maintenance reserve fund allocation (3)	 270
Credit facilities available for unrestricted use	\$ 440

- The Company's credit facility with a syndicate of Canadian financial institutions in the amount of \$675 is comprised of two equal tranches maturing on September 12, 2019 and September 12, 2021. The credit facility agreement provides for loans at varying rates of interest based on certain benchmark interest rates, specifically the Canadian prime rate and the Canadian bankers' acceptance rate, and on the Company's credit rating at the time of drawdown. A utilization fee is also payable on borrowings in excess of 25% of the available facility. The Company is required to pay commitment fees, which are dependent on the Company's credit rating. The Company is in compliance with the credit facility covenants as at February 28, 2017.
- The letter of credit facilities for pension funding purposes are comprised of four facilities with Canadian financial institutions totalling \$515, which will mature on December 31, 2017, unless extended. The Company intends to seek extensions of the maturity dates. Of the \$480 in letters of credit shown above as outstanding as at February 28, 2017, \$468 was drawn for pension solvency funding purposes.
- The operations and maintenance reserve fund may be used to pay operating and maintenance expenses, if required (see also "LIQUIDITY AND CAPITAL RESOURCES Financial Instruments and Risk Management: Reserve Funds and Financial Instruments").

(in millions of dollars)

The table below shows our long-term debt, liquidity and investments profile.

LONG-TERM DEBT:		February 28 2017		August 31 2016		
Bonds and notes payable	ф	F0F	Φ.	F0F		
Under the Master Trust Indenture	\$	525	\$	525

	\$		\$	279		

^{(1) \$440} of this borrowing capacity is available as described in the previous table (August 31, 2016 - \$446).

Credit Ratings

The Company's debt obligations have been assigned the following credit ratings:

Rating Agency	Senior Debt	General Obligation Notes	Outlook
DBRS Limited (DBRS)	AA	AA (low)	Stable
Moody's Investors Service (Moody's)	Aa2	Aa2	Stable
Standard & Poor's (S&P)	AA	AA-	Stable

⁽²⁾ See also "LIQUIDITY AND CAPITAL RESOURCES – Financial Instruments and Risk Management: Financial Risk Management" (specifically "Liquidity Risk").

(in millions of dollars)

On March 27, 2017, Standard & Poor's (S&P) issued a press release affirming the Company's ratings and stable outlook. The press release noted the Company's credit strengths as holding a monopoly over an essential transportation service, legislated ability to levy user charges on airlines to meet financial requirements and sound debt service coverage ratios (DSCRs). They noted that the Company's weaknesses are a high but declining debt burden, air traffic demand exposure and a large solvency-based pension deficit.

S&P stated that "they expect the Company's rate reductions to erode its financial metrics temporarily." They went on to state, "nevertheless, we expect its financial profile to improve beginning in fiscal 2019, thanks to growing traffic and steady rate levels." They stated that they believe the Company has adequate liquidity but noted their expectation that "NAV CANADA will secure additional letter of credit capacity to fund any incremental pension funding requirements, thereby keeping its unrestricted borrowing capacity relatively stable over the next two years."

S&P noted that the Company's legislated perpetual monopoly is over civil air navigation in Canadian-controlled airspace and stated "accordingly, its air traffic volumes depend not on any one region, but the entire country and international airspace assigned to Canada by treaty. S&P therefore consider the Company's service area to be more diversified than that of airport operators, pointing to greater cash flow stability in support of debt service obligations."

On February 27, 2017, Moody's issued a credit opinion affirming NAV CANADA's base line credit assessment at aa2 and its senior and subordinated ratings at Aa2. Moody's noted the Company's following credit strengths:

- Essential infrastructure asset for the Canadian air transportation system;
- Monopoly provider of civil air navigation services over a very large airspace;
- Legislated right to establish and levy rates and charges as needed to meet financial requirements resulting in good degree of cash flow predictability;
- Continued strong traffic growth;
- Manageable capital expenditure program.

They also noted the following credit challenges:

- Defined benefit pension plan creates recurring calls on cash;
- Periods of weak debt service coverage ratio when the Company depletes its rate stabilization account.

They stated that "the rating outlook is stable, reflecting our expectation that NAV CANADA will be prudent and take into account its overall financial position and upcoming obligations when contemplating a rate decrease and vice versa that it will implement the necessary rate increases if traffic growth does not materialize."

Our credit ratings provided by DBRS remain unchanged from those described in our fiscal 2016 annual MD&A.

(in millions of dollars)

Cash Requirements

The following information about our contractual obligations and other commitments summarizes certain of our liquidity and capital resource requirements.

Pension Plans

Required pension contributions to the Company's pension plans are determined by annual actuarial valuations for funding purposes performed as at January 1 (see below under "Pension Contributions (Going Concern and Solvency)"). Our latest actuarial valuations (for funding purposes) as at January 1, 2016 were completed and filed with the Office of the Superintendent of Financial Institutions Canada in June 2016.

Pension Plans' Accounting Deficit: The Company's pension plans had an accounting deficit of \$1,415 as at the annual measurement date of August 31, 2016 and an accounting deficit of \$1,013 as at February 28, 2017. The \$402 decrease in the deficit position during the six months ended February 28, 2017 is primarily due to net actuarial gains of \$465 partially offset by actuarial accounting expense exceeding Company contributions by \$62. The \$465 of net actuarial gains are primarily due to a \$533 actuarial gain from a 50 basis point increase in the discount rate to 3.90% from 3.40% at August 31, 2016, partially offset by a return on plan assets \$68 less than the expected return based on the discount rate at August 31, 2016.

Regulatory Recovery of Pension Costs: As described in our fiscal 2016 annual MD&A, the Company uses a regulatory approach for pension costs to determine the net impact charged to net income (loss). The objective of this approach is to expense the cost of the Company's cash contributions to the pension plans.

The recovery of pension benefit costs (charged to the statement of operations) was as follows:

	Febru 20	hs ended February 29 2016		
Pension benefit costs (Per IAS 19 Employee Benefits)				
Current service costs	\$	88	\$	72
Net interest costs related to employee benefits		23		16
Net movement in regulatory deferral account				
related to pensions				
Regulatory decrease		(62)		(21)
Recovery of pension benefit costs	\$	49	\$	67

Pension Contributions (Going Concern and Solvency): The actuarial valuations for funding purposes of the pension plans performed as at January 1, 2016 reported a going concern deficit of \$76 (January 1, 2015 – a deficit of \$268).

(in millions of dollars)

The regulations governing the funding of federally regulated pension plans include a solvency test, which assumes the plans are terminated as at the valuation date. The actuarial valuations performed as at January 1, 2016 reported a statutory solvency deficiency of \$306 (January 1, 2015 – a statutory solvency deficiency of \$556).

The Company is currently meeting its pension solvency funding requirements with letters of credit. Pension funding regulations came into effect in April 2011 permitting solvency special payments to be replaced by letters of credit, provided the total value of the letters of credit does not exceed 15% of the pension plan's assets. As of February 28, 2017, the Company has put in place letters of credit totaling \$468 (representing 9% of registered pension plan assets as at February 28, 2017) to meet its cumulative pension solvency funding requirements. Commencing in April 2017, the Company will fund its remaining calendar 2017 solvency funding requirements with cash contributions of approximately \$42 by the end of fiscal 2017. For the annual period beginning July 1, 2017, solvency funding requirements will be based on the January 1, 2017 actuarial valuations.

The amount of required Company contributions and additional letters of credit for future years will be dependent on the investment experience of plan assets, the discount rates and other assumptions that will be used in future actuarial valuations to determine plan liabilities, as well as any changes in pension plan design or funding requirements that may be enacted.

Contractual Obligations

A breakdown of contractual obligations for the next five fiscal years and thereafter is presented in the following table.

	Remaining payments – for years ending August 31											
		Total		2017		2018		2019	2020	2021	The	ereafter
Derivative liabilities	\$	15	\$	-	\$	-	\$	15	\$ -	\$ -	\$	-
Long-term debt (including												
current portion) (1), (2)		1,625		25		375		275	25	275		650
Interest payments (2)		649		37		77		69	53	46		367
Capital commitments (3)		139		42		42		11	12	6		26
Operating leases		40		4		8		7	6	6		9
Investment in preferred												
interests in Aireon ⁽⁴⁾		20		-		20			-	 		<u>-</u>
Total contractual obligations	\$	2,488	\$	108	\$	522	\$	377	\$ 96	\$ 333	\$	1,052

Total contractual obligations exclude commitments for goods and services in the ordinary course of business. Also excluded are other long-term liabilities mainly due to reasons of uncertainty of timing of cash flows and items that are non-cash in-nature.

(1) Payments represent principal of \$1,625. The Company intends to refinance principal maturities at their maturity dates. The Company may choose to repay a portion of these maturities with available cash, and/or may increase the size of a re-financing to generate additional liquidity or for other purposes, and/or may choose to redeem, in whole or in part, an issue in advance of its scheduled maturity date.

(in millions of dollars)

- Further details on interest rates and maturity dates on long-term debt are provided in note 21 to our fiscal 2016 annual consolidated financial statements.
- (3) The Company has firm commitments for the acquisition of property, plant and equipment and intangible assets amounting to \$139 as at February 28, 2017 (August 31, 2016 \$118).
- (4) Payments represent contractual obligations to invest in preferred interests of Aireon, subject to conditions pursuant to the agreements the Company entered into in November 2012 which set out the terms of its participation in Aireon, as amended. Amounts are presented in CDN translated using the hedged rate for the remaining tranche investment.

The Company's letters of credit are discussed under the heading "LIQUIDITY AND CAPITAL RESOURCES – Liquidity and Financing Strategy".

The Company's contributions to its pension plans are discussed under the heading "LIQUIDITY AND CAPITAL RESOURCES – Cash Requirements: Pension Plans".

Capital Management

The Company views capital as the sum of its issued long-term debt, retained earnings (deficit) and accumulated other comprehensive income, regulatory deferral accounts and certain employee benefits, as depicted in the following table. This definition of capital is used by management and may not be comparable to measures presented by other companies.

	ruary 28 2017	August 31 2016		
Bonds and notes payable	\$ 1,619	\$	1,719	
Equity:				
Retained earnings (deficit)	(6)		28	
Regulatory deferral accounts:				
Debit balances	(1,197)		(1,708)	
Credit balances	448		476	
Employee benefits:				
LTD (asset) liability	(3)		1	
Liability for funded pension benefits	941		1,346	
Liability for accumulating sick leave	 21		21	
Total capital	\$ 1,823	\$	1,883	

Management's approach and objectives when managing capital remain unchanged from those described in our fiscal 2016 annual MD&A.

(in millions of dollars)

Financial Instruments and Risk Management

Restructured and Other Investments in ABCP³

(See also "LIQUIDITY AND CAPITAL RESOURCES - Liquidity and Financing Strategy").

During the six months ended February 28, 2017, the Company received the remaining \$285 principal balance of MAV II Class A-1 and Class A-2 notes and released fair value provisions of \$13 related to the notes. The Company also received the remaining \$7 principal balance of restructured ABCP. As at February 28, 2017, the Company has investments in other notes with a \$nil fair value and a face value of \$1

Reserve Funds and Financial Instruments

Under the Master Trust Indenture, we maintain a debt service reserve fund and an operations and maintenance reserve fund. We are also required to meet certain minimum liquidity levels under the General Obligation Indenture. The requirements of the debt service reserve fund and the operations and maintenance reserve fund remain unchanged from that described in our fiscal 2016 annual MD&A.

Financial Risk Management

The Company is exposed to several risks as a result of holding financial instruments, including interest rate risk, foreign exchange risk, price risk, credit risk and liquidity risk. The Company's exposure to financial risks and how the Company manages each of those risks are described in the Company's fiscal 2016 annual MD&A. There were no significant changes to those risks or to the Company's management of exposure to those risks during the six months ended February 28, 2017, except as noted below.

Interest Rate Risk: During the six months ended February 28, 2017, the Company received the remaining principal relating to its investments in MAV II notes of \$285 and the remaining \$7 principal balance of ABCP, decreasing the Company's financial assets exposed to interest rate risk. These investments had earned interest at variable rates. The receipt of these notes also reduced the Company's exposure to price and credit risk.

As at February 28, 2017, the Company has \$370 invested in financial assets that bear interest at floating rates. If interest rates decline, earnings on these instruments will fall. A 100 basis point change in variable interest rates would result in an annual impact of approximately \$4 in the Company's earnings before rate stabilization adjustments.

Foreign Exchange Risk: The Company designates certain of its forward contracts as cash flow hedging instruments to hedge the Company's exposure to the impact of exchange rate fluctuations. As at February 28, 2017, the Company has entered into a forward contract to purchase \$15 U.S. (\$20 CDN) to hedge the Canadian dollar cost related to its outstanding commitment to acquire additional preferred interests in Aireon.

The foreign exchange rate sensitivity is the net amount of foreign exchange rate exposure of the items at the reporting date, less foreign currency hedges. As at February 28, 2017, if the Canadian dollar strengthened or weakened by 10% against the U.S. dollar, all other variables remaining constant, net income (loss) before net movement in regulatory deferral accounts would have been impacted by \$30 (August 31, 2016 - \$25).

³ Note: See "INTRODUCTION – Caution Concerning Forward-Looking Information", page 1

(in millions of dollars)

Other Price Risk: The fourth tranche investment in preferred interests of Aireon was made on December 21, 2016. As a result of the additional investment, the fair value of the investment in Aireon increased to \$333 as at February 28, 2017 (August 31, 2016 - \$291). A change of 5% in the fair value would impact finance income (other finance costs) by approximately \$11 U.S. (\$15 CDN) as at February 28, 2017 (August 31, 2016 - \$10 U.S. (\$13 CDN)).

Legal Proceedings

The Company is party to certain legal proceedings in the ordinary course of its business. Management does not expect the outcome of any of these proceedings to have a material adverse effect on the consolidated financial position or results of operations of the Company.

CHANGES IN ACCOUNTING POLICIES

The Company's Q2 fiscal 2017 financial statements were prepared in accordance with IAS 34 *Interim Financial Reporting* as issued by the International Accounting Standards Board (IASB). Significant accounting policies used in the Q2 fiscal 2017 financial statements are disclosed in note 3 of the Company's fiscal 2016 annual consolidated financial statements, except for the application of new standards, amendments and interpretations effective September 1, 2016. The accounting policies have been applied consistently to all periods presented, unless otherwise indicated.

In December 2014, the IASB issued Disclosure Initiative (Amendments to IAS 1 *Presentation of Financial Statements*). These amendments improve the existing presentation and disclosure requirements and encourage entities to apply professional judgment regarding disclosure and presentation in their financial statements. These amendments were adopted effective September 1, 2016. The adoption of these amendments resulted in no change to the Q2 fiscal 2017 financial statements. Immaterial disclosures are expected to be removed from the Company's annual consolidated financial statements.

Future Accounting Pronouncements

The IASB has issued a number of standards and amendments that are not yet effective. The Company continues to analyze these standards and amendments to determine the extent of their impact on its consolidated financial statements.

The Company has commenced its analysis of IFRS 9 *Financial Instruments* and expects to early adopt the requirements of the new standard during its fiscal year ending August 31, 2018.

At this time, the Company does not expect to adopt any of the other standards or amendments noted in our fiscal 2016 annual MD&A before their respective effective dates.

(in millions of dollars)

CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS

The preparation of financial statements in conformity with IFRS requires management to make estimates and judgments that affect the reported amounts of revenue and expenses during the period, the reported amounts of assets and liabilities, and the disclosure of commitments and contingencies at the date of the financial statements. These estimates and judgments are based on historical experience, current conditions and various other assumptions made by management that are believed to be reasonable under the circumstances. By their nature, these estimates and judgments are subject to uncertainty and the amounts currently reported in the Company's consolidated financial statements could, in future, prove to be inaccurate. Any changes from those estimates and judgments could have a material impact on our consolidated financial statements. The estimates and judgments are reviewed on an ongoing basis.

The Company's critical accounting estimates and judgments applied in the preparation of the Company's Q2 fiscal 2017 financial statements are consistent with those applied and disclosed in our fiscal 2016 annual consolidated financial statements and as described in the fiscal 2016 annual MD&A.

DISCLOSURE CONTROLS AND PROCEDURES AND INTERNAL CONTROL OVER FINANCIAL REPORTING

There have been no changes to the Company's internal control over financial reporting (ICFR) during the quarter ended February 28, 2017 that have materially affected or are reasonably likely to materially affect the Company's ICFR.
