March Monthly Report

At 30 March 2012

By obtaining access to and reviewing this monthly report, you acknowledge and agree to be bound by the following:

This monthly report does not constitute or form part of any offer or invitation to sell or issue, or any solicitation of any offer to purchase or subscribe for, any shares or other securities of Volta Finance Limited (the "Company") whose portfolio is managed by AXA Investment Managers Paris (the "Investment Manager"), or securities of any other entity (together, the "Securities"). Nor shall this monthly report or any part of it nor the fact of its distribution or publication (on the Company's website or otherwise) form the basis of, or be relied on in connection with, any contract or investment decision in relation to the Securities. This monthly report does not constitute a recommendation regarding the Securities. The information contained herein is for information purposes only, does not purport to contain all the information that may be required to evaluate the Company or any other entity or their respective financial positions.

This monthly report speaks only as of its date and neither the Company nor the Investment Manager is under any obligation to update the information contained herein. Certain information and estimates contained herein are originated by or derived from third parties and therefore the accuracy and completeness of such information and estimates has not been verified. It should also be noted that the financial information contained herein has not been audited. No representation or warranty whatsoever, whether express or implied, is given by or on behalf of the Company, the Investment Manager, their affiliates, or their respective directors, officers or employees or any other person as to (a) the accuracy or completeness of the information or (b) the opinions contained in this monthly report. None of the Company, the Investment Manager, any of their affiliates, or their respective directors, officers or employees or any other person accepts any liability whatsoever for any such information or opinions. Nothing contained herein shall be relied upon as a promise or representation whether as to past or future performance of the Company, any other entity, any Securities or any asset class in the Company's portfolio. No statement in this monthly report is intended to be nor may be construed as a profit forecast and there can be no assurance that the assumptions described herein, the returns and targets (including without limitation target portfolio composition) indicated herein will be achieved.

The valuation of financial assets can vary significantly from the prices that the Company could obtain if it sought to liquidate the positions due to market conditions and general economic environment. Such valuations do not constitute a fairness or similar opinion and should not be regarded as such. They follow the valuation policy of the Company as adapted from time to time in the best interests of the shareholders, taking into account the evolutions and the illiquidity of financial markets.

Dear Shareholders and Investors,

At the end of March 2012, the Gross Asset Value (the "GAV") of Volta Finance Limited (the "Company", "Volta Finance" or "Volta") was €159.1 m or €5.14 per share, an increase of €0.35 per share (or 7.3%) from €4.79 GAV per share at the end of February 2012. This GAV does not take into account the scheduled dividend payments, on 19th April. Taking into account this payment the pro forma GAV of the company would be €4.92 per share.

After a 2011 +10.3% annual performance of Volta's assets reflecting a decrease in prices more than compensated by actual cash flows received from the assets, 2012 starts the year with a positive 18.3% increase in the first quarter.

The March mark-to-market variations* of Volta Finance's asset classes have been: +139.1% for ABS investments, +0.6% for mezzanine of CDO investments, +4.1% for residuals of CDO investments and +3.3% for Corporate Credit investments. The GAV increase in March was in line with the positive stance, overall, on credit markets and in particular the fact that the UK non-conforming ABS deals resumed paying significant cash flows. The value of these six deals increased by €4.7m or €0.15 per share in March (see further below).

Volta's assets generated the equivalent of €3.3m of cash flows in March 2012 (non-Euro amounts converted to Euro using end-of-month cross currency rates and excluding principal payments from debt assets) bringing the total cash generated during the last six months to €15.2m. This amount can be compared with €12.9m for the previous six-month period ended in September 2011 (the most recent comparable period considering the seasonality of payments).

In March 2012, the Company purchased one asset (Prelude) for €0.1m.

At the end of March, Volta held €9.1m in cash (no margin calls received or posted in respect of the currency hedge). Considering the pace at which cash flows are generated and the need to keep cash available for the next dividend payment in April, Volta's capacity for new investments amounts to €2m.

MARKET ENVIRONMENT

In March 2012, credit spreads were almost unchanged in Europe and in the USA reflecting very modest changes in the overall economic situation. The spread of the 5 year European iTraxx index and of the 5 year iTraxx European Crossover Index (series 16) went respectively, from 129 and 568 bps at the end of February 2012 to 124 and 576 bps at the end of March 2012. During the same period, credit spreads in the US, as illustrated by the 5y CDX main index (series 17), went from 93 to 87 bps at the end of March 2012. According to the CSFB Leverage Loan Index, the average price for USA liquid first lien loans increased from 93.96% at the end of February 2012 to 94.41% at the end of March 2012.**

VOLTA FINANCE PORTFOLIO

In March 2012, no particular event materially affected the situation of the Corporate Credit holdings. The managed default of the Hellenic Republic has been priced in for months and had no material impact on Volta's GAV in March. The first loss positions in this bucket (ARIA III and the residual positions in JAZZ III) remain highly sensitive to any new credit event, especially to debt of financial institutions considering the significant exposures to banks held through these positions.

As regards the Company's investments in residual and mezzanine debt of CDOs, at the end of March 2012, all 53 positions in residual or mezzanine debt of CDOs are currently paying their coupons. No particular event materially affected the situation of these positions.

As regards the Company's ABS investments, at the end of March 2012, nothing special affected the main position (Promise Mobility) but the other investments in this bucket (6 UK non-conforming residual positions) appeared to have collectively provided strong cashflows recently. Thanks to the Bank of England's low rate policy, even borrowers in significant arrears have shown themselves able to pay substantial parts of their monthly payments and servicers had reduced cases of so-called "fire-sales" in repossession of homes. As a result, several UK non-conforming deals have seen their reserve fund being replenished and even provided excess spreads throughout 2011. This is actually the case now for all but one of Volta's non-conforming ABS investments; they have produced GBP 1.4m in Q4 2011 and GBP 1.3m in Q1 2012. Although, the bulk of borrowers in significant arrears, even those currently paying their monthly instalment, remain an issue for these deals and the situation is still far from being resolved. Furthermore, these cashflows in our view remain too volatile and dependant on rates and servicers' policies in the medium term. Nevertheless with the global economic situation and low growth forecast, we can reasonably consider that rates will remain at their record low for the following quarters, and the servicers' practices of the past year reassure us they will likely continue to pursue this course of action during the coming months. Thus, the decision has been taken to estimate one to three years of current excess spread on these deals, in a reasonably conservative manner, revising the valuation of such UK non-conforming deals that collectively went from the end of February value of €0.2m to €4.7m for the end of March.

VOLTA FINANCE PORTFOLIO (continued)

Please find in the table below the market value and average prices of Volta's main buckets (the ABS bucket is excluded as it is comprised of different asset types and its average price is meaningless):

	Market Value (€m)	Current Average Price	<i>Last Month Average Price</i>
Corporate Credits	28.4	44.2%	44.0%
CDO Equities USD	42.1	73.7%	71.9%
CDO Equities EUR	3.3	36.7%	37.3%
CDO Debts USD	35.3	74.6%	72.8%
CDO Debts EUR	30.6	56.6%	55.1%

The Company considers that opportunities could arise in several structured credit sectors in the current market environment. Amongst others, mezzanine or senior tranches of CLOs, European ABS as well as tranches of Corporate Credit portfolios could be considered for investments. Potential investments could be made depending on the pace at which market opportunities could be seized and cash is available. Depending on market opportunities, the Company may aim to take advantage of the current volatility in prices to sell some assets in order to reinvest the sale proceeds on assets representing, at the time of purchase, what the Company considers a better opportunity.

* "Mark-to-market variation" is calculated as the Dietz-performance of the assets in each bucket, taking into account the Mark-to-Market of the assets at month-end, payments received from the assets over the period, and ignoring changes in cross currency rates Nevertheless, some residual currency effects could impact the aggregate value of the portfolio when aggregating each bucket.

** Index data source: Markit, Bloomberg.

About Volta Finance Ltd

Contact on the portfolio composition

Volta Admin Team
VoltaAdmin@list.db.com

Volta Finance Limited is incorporated in Guernsey under the Companies (Guernsey) Laws, 1994 to 1996 (as amended) and listed on Euronext Amsterdam. Its investment objectives are to preserve capital and to provide a stable stream of income to its shareholders through dividends. For this purpose, it pursues a multi-asset investment strategy targeting various underlying assets. The assets that the Company may invest in either directly or indirectly include, but are not limited to: corporate credits; sovereign and quasi-sovereign debt; residential mortgage loans; automobile loans. Volta Finance Limited's basic approach to its underlying assets is through vehicles and arrangements that provide leveraged exposure to some of those underlying assets.

Volta Finance Limited has appointed AXA Investment Managers Paris, an investment management company with a division specialised in structured credit, for the investment management of all its assets.

Corporate Credits

Investment grade, sub-investment grade and unrated credits. These may include industrial companies as well as financial institutions (such as banks), among others. The Company uses the term "corporate credits" to refer both to cash obligations (bonds or loans) of corporate or other commercial borrowers and to synthetic arrangements (such as credit default swaps) referencing these entities.

The Company's focus in this area is on acquiring or creating leveraged exposure to diversified portfolios of these credits (e.g., through bespoke collateralised swap obligations ("CSOs")). The Company includes in this Primary Target Asset Class cash and synthetic CDOs/CSOs that have corporate credits a majority of which are investment grade.

Asset-Backed Securities

The Company's initial focus in this area is on residual income positions of asset-backed securities, although the Company may also invest in debt tranches of ABS.

CDOs

The Company intends to invest in the securities of collateralised debt obligations, collateralised loan obligations (CLO), collateralised synthetic obligations and similar leveraged investment vehicles (collectively "CDOs").

The Company's focus in this Primary Target Asset Class is through residual income or mezzanine debt positions of CLOs actively managed.
