23. All investment decisions in connection with assets of the Company must be taken with regard to restrictions on investing assets of the Company provided for in applicable legal acts.
24. For the sake of efficiency of the Company's activities and control over its investments, an Investment Committee shall be formed by a decision of the Board of the Management Company. The regulations of the Investment Committee shall be made public on the Company's website www.invbalticrealestate.lt.
26. For the sake of efficiency of activities of the Company, an Advisory Committee may be formed by a decision of the Board of the Management Company. The purpose of the Advisory Committee is to ensure having knowledge about investments objects, into which the Company's assets may be invested, and knowing their specifics. The Advisory Committee shall present its opinion and conclusions to the Investment Committee regarding investments of the Company.
27. The procedure of formation, responsibilities, functions of the Advisory Committee, decision-making procedure and other procedures of the Advisory Committee shall be set in the regulations of the Advisory Committee, which shall be made public on the Company's website www.invlbalticrealestate.lt.

29. In case of an essential change in the Company's investment strategy, all the Shareholders must be informed about that in writing at least 3 months in advance by sending them a relevant notification. In such cases, the Shareholders must be given a possibility to demand redemption of the Shares owned by them without any additional deductions within a sufficient period of time, which cannot be shorter than 2 months after properly informing the Shareholders about the planned change of the investment strategy of the Company (redemption of the Shares shall be performed following Article 89 of these Articles of Association). Shareholders must be informed about this right by sending a notification about the planned change of the investment strategy of the Company.
30. An investment object(s) of the Company can be transferred only subject to prior consent of the Depository.
31. The Company may own investment objects directly and it may own securities of Real Estate Companies. When investing through Real Estate Companies, the Depository is to be provided with documents in connection with investments into Real Estate Companies in order that the Depository could perform its functions provided for in legal acts.
32. If necessary, funds may be borrowed in the name of the Company in order to additionally finance investment objects acquired by the Company (or by use of Real Estate Companies) and in this way seek higher investment return. The Management Company can take a decision to borrow in the name of the Company up to 50 percent of real estate value for not longer than until the end of activities of the Company. The Company may lend its assets to companies that are directly controlled by the Company.
33. The Company shall not use a benchmark.

34. After incorporation of the Company, its investment portfolio can fail to meet the set diversification requirements for 4 years after the date when the Supervisory Authority issued a permit to certify documents of its incorporation and choose a Depository (issued a license to engage in activities of a closed-end investment company). In all cases, the right not to meet the set diversification requirements does not cancel the duty of the Management Company to invest assets of the Company in compliance with requirements set in Articles 16 – 18 hereof.
35. If after the end of the term set in Article 34 hereof investment requirements are violated for reasons that the Management Company cannot control, any non-conformity must be eliminated as soon as possible, but in any case no later than within one year. This term can be longer only in exceptional cases, when the Management Company cannot correct the situation due to reasons beyond its control. In such a case, after the end of the one-year term, the Management Company must immediately inform the Supervisory Authority in writing about the situation and reasons for it. The notification must also indicate the expected date of fulfilment of the requirement.

V. INVESTMENT RISKS

36. Investments into Shares are related to higher than average, long-term risk. The Company cannot guarantee that the Shareholders will get invested funds back.

General risk

37. The value of an investment into real estate can fluctuate in the short term depending on the general economic situation, real estate lease and sale prices, demand and supply fluctuations. Investments into real estate should be made for a medium or long period in order that the investor could avoid the risk of short-term price fluctuations. Investments into real estate are related to higher than average risk. If investments are not profitable or in case of other unfavourable circumstances (inability to pay creditors in time), bankruptcy proceedings can be instituted against the Company. Redemption of the Shares is limited, i.e. a Shareholder cannot demand that the Company or the Management Company, which took over its management, would redeem the Shares. But a Shareholder will have a possibility to sell Shares in the secondary market (cf. Articles 85 – 87 of the Articles of Association).

Real estate development risk

38. Real estate projects developed by the Company can take longer than planned or cost more than planned and return on investments of the Company may decrease for this reason. Managing this risk, the Company will assign sufficient resources for control over the budgets and performance terms of real estate development projects.

Leverage risk

39. Leverage risk is related to possible depreciation of real estate objects acquired with borrowed money. The bigger the leverage, the higher probability of this risk is.

Investment diversification risk

40. This is a risk that one bad investment can have a significant effect on the results of the Company. In order to reduce this risk, the Company will have a sufficient number of different real estate objects in its portfolio, in this way maintaining the proper diversification level.

Risk of the management and human resources

41. The success of the Company's investments will largely depend on decisions taken by persons in the Management Company who are responsible for management of the Company and on experience and capabilities of the said persons. There is no guarantee that the same persons will always remain responsible for management of the Company, however efforts will be used that activities of the Company would always be taken care of by properly qualified persons.

Risk of conflicts of interest

42. There is a risk that there will be situations when interests of the Management Company (or persons related to it) and the Company or Shareholders will differ or interests of individual Shareholders will differ, i.e. there will be a conflict of interest. When it is impossible to avoid a conflict of interest, the Management Company must ensure that Shareholders are treated fairly. Employees of the Management Company must immediately, as soon as they become aware of such information, notify the Investment Committee about a potential or existing conflict of interest. The Investment Committee, approving of investment decisions, shall take into account the information presented to it about potential or existing conflicts of interest. The Investment Committee shall immediately inform the head and the Board of the Management Company about conflicts of interest it is aware of. Following legal acts regulating organisation of activities of collective investment undertakings, the Management Company has implemented appropriate measures for avoiding and managing conflicts of interest, which enable to perform the activities of managing the risk of conflicts of interest and managing conflicts of interest independently, in order to avoid/reduce the risk of conflicts of interest or properly manage a conflict of interest when it occurs.

Risk of changes in laws and regulation

43. There is a risk that upon changes in legal acts of the Republic of Lithuania or the States where assets of the Company are invested, such changes in legal acts can have a negative effect on the protection of the Company's investments, their profitability and value or such changes in legal acts can have a negative effect on rights and interests of the Company otherwise. Taking that into account, the Company will invest only into assets located in the Member States of the European Union.

Tax risk

44. There is a risk that upon changes in economic conditions, political situation in the country or due to any other reasons, new taxes on Shareholders, the Company or investment objects of the Company will appear or the rates of current taxes will increase, therefore the price, liquidity and/or attractiveness of the Shares or the value of investments of the Company may decrease.

Taxation and legal risk

45. Upon change of legal acts related to equity securities or the national taxation policy, this may result in the change of attractiveness of the Shares. For this reason, the liquidity and/or the price of the Shares may decrease.

Risk of inflation and deflation

46. There is a risk that in case of inflation the value of a Share will grow slower than inflation, which would result in the return lower than inflation. In such a case, the real return earned by persons who sold Shares in the market from increase in the value of the Shares can be smaller than expected. In case of deflation, there would be a risk that the value of the Company's investments will decrease by reason of the drop of the general price level.

Tenants' risk

47. The Company will seek to let real estate objects at as high prices as possible. Though currently the rent is paid in time (overdue obligations of tenants are very small and are not significant for activities of the Company), there is a risk that upon change (deterioration) of the economic situation the tenants will default on their obligations – this would have a negative impact on the profit and cash flows of the Company. In case of late performance of a large part of obligations, the ordinary business of the Company may be disrupted, it may be necessary to search for additional sources of financing, which may be not always available. The Company, in case of failure to earn planned income from lease or to maintain a high percentage of occupation of the buildings, can face the problem of costs that are not compensated by permanent tenants. This risk may manifest itself in case of big increase in the supply of rented premises and reduction in demand, drop in rental fees. In case of a failure to let the premises at planned prices or in planned scopes, also in case current tenants terminate their lease agreements, the income of the Company could decrease, whereas fixed costs would remain the same. Accordingly, the profit of the Company would decrease.

Credit risk

48. The Company has given and may have given loans to other companies, therefore, in case of deterioration of the financial condition of those companies, there is a risk that the Company will not get back all the loans granted by it.

Risk of financial intermediaries

49. The Company will also incur risk by keeping funds in bank accounts or investing into short-term financial instruments. Currently, no short-term financial instruments are being acquired, excess funds are kept in bank accounts or are used to cover obligations of the Company.

Liquidity risk

50. This is a risk to incur losses due to low liquidity of the market, when it becomes difficult to sell assets at the desired time at the desired price. In management of this risk, the Company will regularly monitor the real estate market, will get ready for the property sale process in advance, in this way reducing the liquidity risk. Acquiring Shares, the Shareholders also assume the risk of securities liquidity – in case of a drop in demand for Shares or delisting them from the stock exchange, investors would find it difficult to sell them. In case of deterioration of the Company's financial situation, the demand for Shares, as well as their price may decrease. Liquidity risk also covers the cash flow disruption risk incurred by the Company due to late payments and/or full default on monetary obligations by insolvent tenants.

Interest rate risk

51. There is a risk that in case of fast recovery of the global economy or increase in inflation, central banks will increase interest rates and it will be more expensive to service loans in connection with the Company's investments, therefore, the value of the Company's investments can decrease. In order to avoid this risk, the Management Company shall seek that the Company would get most of its loans at fixed interest rates. If it seems necessary, the Company shall hedge against interest rate risk when entering into relevant transactions.

Risk of spin-off from AB Invalda INVL

52. On 29 of April 2014 the Company took over 30.9 percent of the assets, equity and liabilities of AB Invalda LT (currently, AB Invalda INVL). If certain obligations of AB Invalda INVL were not known at the time of the spin-off and for this reason were not distributed to all companies operating after the spin-off, all the companies operating after the spin-off will be liable for them jointly and severally. The liability of each of those companies for these obligations will be limited by the amount of the equity, assigned to each of them according to the terms of spin-off. Thus, there is a risk that if the obligations of AB Invalda INVL are not distributed, the Company will be liable for obligations of AB Invalda INVL, which according to

the terms of spin-off are assigned to the Company. The Company does not have any information that the reorganisation of AB Invalda INVL was performed improperly and/or that some of the obligations of AB Invalda INVL are not distributed.

Risk related to uncertainty of legal regulation of activities of the Company

53. Legal acts of the Republic of Lithuania do not clearly regulate the legal status and activities of a closed-end type investment company. Therefore, there is a risk that legal actions may be taken against the Company and/or the Management Company, including, without limitation, disputing obtaining of a license for a closed-end type investment company, powers of the Management Company to manage the Company, also enforcing recovery from the assets of the Company for fulfilment of obligations to creditors of Shareholders and/or the Management Company or demanding that Shareholders and/or the Management Company fulfil outstanding obligations of the Company.

Risk of major shareholders

54. Most Share (approx. 80 percent) and votes carried by them are held by several major Shareholders, who controls AB “Invalda INVL” and Management Company, and therefore they can exercise material impact on the Company. There are no guarantees that the position of these Shareholders will always coincide with the opinion and interests of the Management Company, minor shareholders.

Market risk

55. Acquisition of Shares entails the risk to incur losses due to unfavourable changes in the Share price in the market. A drop in the price of the Shares can be caused by negative changes in the value of assets and profitability of the Company, general share market trends in the region and in the world. Trade in Shares can depend on comments of financial brokers and analysts and announced independent analyses about the Company and its activities. If the analysts give an adverse opinion about prospects of the Shares, this can also have a negative effect on the price of Shares in the market. In assessing Shares, non-professional investors are advised to address intermediaries of public trading or other specialists in this field for help.

Dividend payment risk

56. Though the Company has approved its dividend payment policy, payment of dividend to Shareholders is not guaranteed and will depend on profitability of activities, investments plans and the general financial situation.

Geopolitical risk

57. There is a risk that geopolitical changes can have an effect on activities of the Company (e.g. conflicts of States, internal conflicts in neighbouring States, insurrections, wars) and for this reason the investment value of the Company can decrease or it may be impossible to sell the Company’s investments at the desired time for the desired price.

Risk related to statements in the future tense

58. Statements in the future tense are based on estimate, opinion, expectations and forecasts regarding future events and financial trends that will possibly have an effect on the activities of the Company. Statements in the future tense include information about possible or presumable results of the Company’s activities, investment strategy, contractual relationships, borrowing plans, investment conditions, effect of future regulation and other information. The Company cannot assure that statements in the future tense will reflect future events and circumstances fully and correctly. The Company, the Management Company and its employees do not undertake to adjust or modify statements in the future tense, except to the extent required by laws and these Articles of Association.

Risk of valuation of the Company’s assets

59. The assets of the Company will be evaluated according to the main rules set in these Articles of Association and the Accounting Policy. Valuation of individual assets held by the Company shall be performed by a two property appraiser, however such valuation of assets shall be only determining the value of the assets, which does not automatically mean the exact sale price of an investment held by the Company, which depends on many circumstances, for example, economic and other conditions, which cannot be controlled. Thus, the sale price of investments held by the Company can be higher or lower than the value of assets determined by a property appraiser.

Competition risk

60. The Company, investing into investment objects, will compete with other investors, including, without limitation, with other investment companies or real estate investment funds. Thus, there is a risk that competition with other investors will demand that the Company would conduct transactions at less favourable conditions than it would be possible in other cases.

Risk related to possible liability of the Company

61. There is a risk that the activities of the Company and the general performance results of the Company can be negatively affected by demands and claims regarding non-disclosed or non-identified obligations and/or violations in connection with investments acquired by the Company, which may result in the Company's liability for such obligations and/or violations and for this reason the value of the Company's investments and, at the same time, the price of the Shares can significantly decrease.

Risk of insolvency of the Company

62. In case of realisation of one or several of the above-indicated risks, which would have a negative effect on the value and/or liquidity of investments of the Company, this can result in the Company's solvency problems, when the Company will be incapable of fulfilling its obligations. In such a case, Shareholders can lose all their funds invested into the Company.

Risk related to the duty to redeem Shares of the Company

63. Legal acts provide for a duty of the Company in certain circumstances to redeem its Shares from the Shareholders that requested such redemption (see Article 89 hereof). Accordingly, if the Company becomes subject to the duty to offer to the Shareholders redemption of its own Shares and if such a redemption is requested by the Shareholders holding a significant number of Shares, the Company can be forced to sell its investments urgently, which can significantly reduce the return earned by the Company from sale of its investments. This risk is planned to be managed by means stipulated in Article 96 hereof.

VI. SHARES. PROCEDURE OF ISSUE OF NEW SHARES OF THE COMPANY. RIGHTS GRANTED TO SHAREHOLDERS

64. The number of Shares issued by the Company is 13,150,000, the authorised capital of the Company is EUR 19,067,500. The Company issues ordinary registered shares.

In such a case, in later periods the initial point for calculation of the Performance Fee shall be the value of the highest limit which was reached last (the Net Asset Value or the average weighted capitalisation of the Shares for the last ended quarter on the Nasdaq Vilnius stock exchange) (whichever is less), for which the Performance Fee was paid to the Management Company.
166. The Performance Fee commitment shall be recalculated on the Net Asset Value calculation day (each quarter), taking into account the return earned by the Company from the date indicated in paragraph 163.1 until the relevant Net Asset Value calculation day.
